Dear Sir or Madam,

I am writing to express my interest and enthusiasm for employment in your company.

I am a graduate of East Carolina University with a BFA concentrated in Graphic Design. My work experience includes four years at Mill Creek Golf Course in maintenance and prior to that I worked at the YMCA as a lifeguard. Both of these jobs have served to strengthen my work ethic and teach me the importance of team work and responsibility. Once I got into the field of design I did design work for Going Bogue Outdoors and Mallard Trade Outfitters and have done projects for ECU through the school of design. I have an excellent employment record and take my work very seriously. I work full time and take every task that I am handed with the highest significance. I am looking to expand beyond my current position and take on more responsibilities and grow as a designer and become a part of a team effort to create something special.

I enjoy meeting and talking with people and rarely meet a stranger! I would very much like to meet with you in person to discuss my qualifications and learn more about any employment positions I may be suited for. Thank you for your consideration of my application.

Sincerely,

Chase Greeson
